8/20/2019. 7/19/2019. 6/19. Excision of
infected tissue and non-viable tissue should
be done until a bleeding healthy base is
obtained . 60-62 If new necrotic tissue
continues to form, wounds should be
debrided as often as necessary. 54 It is
important to debride the wound margins as
well as the centre of the wound to prevent
the 'edge effect', 55 that is to turn a
chronic ulcer into an acute one. Some of
that glucose is used right away as energy
and some is stored for after birth. This
stored glucose helps keep your baby's
levels normal for the first few days of life
until she is feeding well. Once mom's breast
milk is established (usually by a baby's third
day of life), it becomes the main source of
sugar for your baby. The sugar in milk
changes to glucose in the body. When this
happens, your baby will also. 01/07/2021 .
